Hello Chloe,

Thanks for writing because there seems to be some confusion so I am going to try to be clearer.

We are seeking data on any new activity for any cases that were originally provided to us plus all data related to new cases that were submitted to felony review and cases that were approved for felony prosecution.

Does this make sense?

Also, we want the data exported in a delimited format that can be read by any database system and not in a proprietary format that requires us to purchase a certain software to be able to read the data.

Let me know if you have any questions or concerns?

Thanks,

Tracy

Tracy – can you please clarify something. I read this as you are seeking an extension of the data from the last date you received, not an update of the entire data set you received the first time. So you'd receive new cases in their pending state, but not updates to the cases in the old data set. As in you'd get whatever new cases have been filed since the last date your previously received data, in their current state – not a complete rerun of what you already have.

Thanks,
 Chloe
